

MICROSOFT MAPPING

Windows 10 lets you download mapping for lots of parts of the world. Try using the mapping for England.

Click Start

Click the three dots in the top right hand corner

Click settings

Click Choose Maps

Click download maps

Click Europe

Click United Kingdom

Click England

Click England again

Click the Camera like icon on the bottom of the screen (note the size of the file and check your storage capacity)

Close the screen using the X (top right)

Click the settings icon (cog shape) on the bottom line and you will see it down load.

Check automatic map updates is on.

Once it has down loaded close the screen using the X (top right)

Now go to start look for the Maps App and click on it

Search on a location

Use the grey panel on the right to access data. In the Map view section, you have the option of aerial or road views. Turn the traffic data on and you can see where the road closures are, traffic incidents and where there is current congestion in red if you have a live internet connection.. You can also access traffic cameras.

In the top left second button in there is the opportunity to get directions between places.

Because you download the mapping data to your PC / laptop / tablet it is available even when you do not have an Internet connection although the current traffic data will not be available.
